٧.	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability	/;
	citations and explanations supporting such statement	

#### 1. statement

Novelty (N)	Claims Claims	1-189 NONE	YES NO
Inventive Step (IS)	Claims Claims	NONE 1-189	YES NO
Industrial Applicability (IA)	Claims Claims	1-189 NONE	YES

#### 2. citations and explanations (Rule 70.7)

Claims 1-189 lack an inventive step under PCT Article 33(3) as being obvious over Hendricks (WO 95 15649) in view of Barney et al. (US 5,341,426) and Wreford-Howard.

Considering claims 1, 130 and 144, Hendricks discloses a method and corresponding apparatus for encrypting electronic books for delivery between two or more parties and comprising:

- a) supplying electronic book (pages 6-8);
- b) supplying encrypted electronic book (see the entire document including but not limited to page 8, lines 32-34, page 10, lines 9-14, page 11, lines 3-11, figures 3 & 4);
- c) decrypting the encrypted electronic book (page 19, line 30 and figure 12, step 832); and wherein
- d) the electronic book is delivered to a second party (262 or 266) from a first party (208 or 250).

However, Hendricks fails to specifically disclose encrypting and decrypting keys and verifying that the second party received the electronic book as recited in the claims.

Barney discloses various types of encryption and decryption keys and techniques for providing secure communication between a central facility and terminals. See the entire document including but not limited to figures 1-3 and the corresponding text.

Wreford-Howard discloses transmitting data to a second party from a first party and verifying that the second party received the data for the advantage of ensuring that the second party received the data. See column 1, lines 5-10 and column 2, lines 5-27

It would have been obvious to one of ordinary skill in the art to modify Hendricks' system to include encryption and decryption keys, as taught by Barney, for the advantage of providing secure communication between a central facility and terminals.

Additionally, it would have been obvious to one of ordinary skill in the art to modify the combined systems of Hendricks and Barney to include verifying that the second party received data such as an electronic book, as taught by Wreford-Howard, for the (Continued on Supplemental Sheet.)

Continuation of: Boxes I - VIII

Sheet 10

#### I. BASIS OF REPORT:

This report has been drawn on the basis of the description, page(s) 1-110, as originally filed. page(s) NONE, filed with the demand. and additional amendments: NONE

This report has been drawn on the basis of the claims,

page(s) 113, 117-119, 123-124, 127, 129-131, 135-138, 140 as originally filed.

page(s) NONE, as amended under Article 19.

page(s) NONE, filed with the demand.

and additional amendments:

Pages 111, 112, 114-116, 120-122, 125-126, 128, 132-134 and 139, filed with the letter of 02 January 2002

This report has been drawn on the basis of the drawings,

page(s) 1-55, as originally filed.

page(s) NONE, filed with the demand.

and additional amendments:

NONE

This report has been drawn on the basis of the sequence listing part of the description: page(s) NONE, as originally filed. pages(s) NONE, filed with the demand.

and additional amendments:

NONE

V. 2. REASONED STATEMENTS - CITATIONS AND EXPLANATIONS (Continued): advantage of ensuring that the second party received the data transmitted from a source.

Claims 2-129, 131-143 and 145-189 are met by the combined systems of Hendricks and Barney, wherein Hendricks discloses the detail features of the electronic book and Barney discloses the details and various types of encryption/decryption techniques.
